## PROJECTS

### Project Workspace (SharePoint-Salesforce integration) (02/2017 – 06/2017) [🔗](#)

- Main Aim of this project is to create a project workspace for sales department, where they can collaborate, share, manage documents as well as user permissions. My main task is to provide a simple user interface so that non-tech users can use the project workspace with ease
- Developed a REST API which is hosted inside a SharePoint Web Application to integrate with Salesforce

### Action Tracker-Personal Business Application (08/2016 – 02/2017)

- The project objective is to facilitate a user from Pfizer to track & customize meetings created by colleagues on his shared outlook calendar in SharePoint site. It is one stop solution where the user can create, update & customize meetings, meeting agendas & meeting action items

### WRD External Partnering Information & Communication (03/2016 – 02/2017) [🔗](#)

- The project objective is to facilitate users to have a glance of the latest updates of Pfizer's External Partnering information using interactive Animated Dashboards, News/Blogs, and News Letters
- SharePoint branding using custom master page & page layouts made by Bootstrap and JQuery from PSD images
- Create interactive animated dashboards & image dashboards
- Create custom Site column, Content Types & List definition
- Designing workflows to send a notification to app user for new deals added to the site based on individual user interests

### Dubai Sports World (03/2015 – 03/2016) [🔗](#)

- The project objective is to facilitate users / anonymous visitors to have a glance of the latest updates of Dubai Sports world.
