## ACADEMIC PROJECT

**BE Final Year Project:** “Utility Agent Based Question Paper Generation”

**Description :** Question paper generation is one of the most preliminary requirements in various level of education field. Traditional method of question paper generation is time-consuming, low efficient and low success. Unlike the existing question paper generators, our utility based agent question paper generator chooses question items in such a way that the difficulty level of each question items takes part in computing exact difficulty level of question paper. The questions are get selected from Master Database which is created by the database creator.
